from this!

Model G-18. Two-Stage Air Cooled Automatic Unit. Vee Belt drive. Tank, 20 x 48—65 gals. 175-lb. cut-off pressure. Displacement, 3 3/4 ft. with 3/4 H.P. motor; 4 1/2 cu. ft. with 1 H.P. motor; 6 cu. ft. with 1 1/2 H.P. motor; 7 1/2 cu. ft. with 2 H.P. motor. Equipment includes 25-ft. hose with chuck, compressor muffler, outlet valve and all fittings.

In 1930—a period of world wide depression—more Quincy Air Compressors were sold, for more money, than during any previous year in this company's history

The reason?

You will find it in the downright *goodness* of Quincy Compressors—their low operating and maintenance costs; their comparative freedom from trouble, and easy accessibility for servicing; their long life.

Look into the Quincy line and you will find yourself looking squarely into the smiling face of sensible economy—the kind of economy that comes from satisfactory service rather than “cheapness.”

Will you take the cue, and use the coupon?
