Quincy Compressor Products Nominated for Plant Engineering 2020 Product of the Year

BAY MINETTE, Ala., November 12, 2020 – The Plant Engineering Product of the Year award is a reader's choice, premier award for products in the manufacturing industry. It has been presented every April for the past 33 years. This year, Quincy Compressor has two products that have been nominated in the compressed air category. Quincy's QOFT rotary tooth compressor, and the QPVS variable speed drive refrigerated air dryer, are both finalists. To win the Product of the Year, Plant Engineering subscribers vote on which product they believe is the premier product. Voting is open beginning Thursday, November 12 - Friday, January 8. The winners will be announced in April 2021 during the currently scheduled Engineering Awards in Manufacturing dinner held in Chicago, IL.

Our QOFT rotary tooth compressor delivers 100% oil-free air with industry leading reliability. It is most often used in food and beverage processing, pharmaceutical manufacturing, chemical and petrochemical processing, and many other industries. The QPVS variable speed drive refrigerated air dryer delivers unbeatable energy savings and reliability in a compact, environmentally friendly unit. These two products speak for themselves in quality and stand above the competition.
