### Quincy Compressor Presented Governor's Trade Excellence Award

BAY MINETTE, Ala., March 6, 2013 – On Wednesday, Alabama Governor Robert Bentley recognized Quincy Compressor along with seven other companies for excellence in exporting goods, promoting exports and successfully engaging in the global marketplace.

*2013 Trade Excellence Award winner Quincy Compressor represented by, (from left to right) John Thompson, President, Jacqueline Gay, Marketing Services Manager, Governor Bentley, Keith Schumacher, VP Marketing & New Business Development and Carl Stokley, Director of International Sales.*

Headquartered in Bay Minette, Alabama, Quincy Compressor is a leading designer and manufacturer of reciprocating and rotary screw air compressors ranging from one-third to 350 horsepower; vacuum pumps and a full line of air treatment components. Quincy also operates facilities in Quincy, Ill., and in Kunshan, China with more than 600 employees worldwide.

"We are pleased to participate in today's event recognizing trade excellence in Alabama," said John Thompson, President of Quincy Compressor. "Participating in a global economy requires efficient operations, a skilled workforce and forward-thinking leadership. At Quincy Compressor, we strive to balance those demands with the growing need for sustainable manufacturing. Today, we thank our dedicated employees who work hand-in-hand with government officials and agencies to make successful trade operations possible."

In 1920, Quincy established its reputation for engineered solutions. Its flagship products, QR-25 and QSI are proven reliable choices for users in some of the toughest conditions like mining, drilling, concrete production and shipbuilding.

Nearly 40 percent of rotary sales are considered one-of-a kind configurations ranging from electrical specialties to freeze-protection options.

In 2004, Quincy Compressor realized global expansion with its facility in China, Q-Tech Air Systems, Ltd., which assembles and tests global rotary screw compressors, such as the QGV. Today, 14 major models from 20 hp to 150 hp have been adapted for the growing Asian market, and Quincy Compressor serves 39 countries, specializing in providing robust equipment to demanding regions.

The Governor presented the eighth annual Governor's Trade Excellence Awards during a ceremony at the State Capitol. The companies receiving the awards ranged in size and represented a variety of industries.

"Exports help us create and sustain more jobs," Governor Bentley said. "That's why exporting is a critical component of Accelerate Alabama, our long-term economic development plan."

According to the Alabama Department of Commerce, Alabama exports totaled \$19.5 billion in 2012, an increase of 9.36 percent from the 2011 total.

- END -

**About Quincy Compressor:** Quincy Compressor is a leading designer and manufacturer of reciprocating and rotary screw air compressors, vacuum pumps and a full line of air treatment components. In business since 1920, Quincy has built its reputation on quality and rugged reliability, building tough air compressors for the most demanding applications.
